Introduction

Agile project management is an interactive method of **determining requirements of projects in a highly flexible and interactive manner**. It is a method of doing projects by **empowering and trusting people, acknowledging change as norm, and promoting constant feedback**.

Characteristics:

1. Place importance on individual and interactions over processes and tools
2. Work software over comprehensive documentation
3. Customer collaboration over contract negotiation
4. Responding to change over following a plan

*A **Certificate of Completion** will be awarded to qualified participants.
