

Certified Information Systems Security Professional (CISSP®) Official Training (2021 New Version)

Course Fee: HK\$18,500 (May apply up to HK\$12,333 subsidy)

*Maximum saving, with the final grant subjects to approval.

This is an (ISC)² official training of Certified Information Systems Security Professional (CISSP).

The course content has been refreshed based on the new CISSP exam outline effective **May 2021** to address information security trends:

- Cyber crimes, risks, ransomware, vulnerability management, threat intelligence, UEBA.
- Cloud: cloud access security broker, microservices, containers.
- Identity and access management: risk based access control, 2FA/MFA, OIDC, Oauth, SSO, JIT, privilege escalation.
- 5G, AI /machine learning tools.
- Development: CI/CD, SOAR, software defined security.
- Supply chain risk management.

Programme code 10011608-01

Date and time 13-15 & 20-21 July 2021
09:00 – 18:00

Venue Webinar : By Zoom
Physical Class : 1/F, HKPC Building,
78 Tat Chee Avenue, Kowloon, Hong Kong

Medium Cantonese with training materials in English

Fee **Early bird price on or before 11 Jun 2021**
- Staff of Organiser or Member of Supporting Organisation: **HK\$16,500** per person
- Non-member: **HK\$17,500** per person
Regular Price
- Staff of Organiser or Member of Supporting Organisation: **HK\$17,500** per person
- Non-member: **HK\$18,500** per person

Remarks Deadline for submission is **29 Jun 2021**.
Late submission will NOT be considered.

Global Recognition

CISSP is the most recognised **global standard** of achievement in the security industry and is found in **over 135 countries**. The credential is recognised by government organisations, including

- **Hong Kong Monetary Authority (HKMA)** in Enhanced Competency Framework on Cybersecurity (2019 Jan)
- **UK National Academic Recognition Information Centre (NARIC)** recognised CISSP certification at RQF Level 7 Master degree standard (2020 May)
- **United States DoD 8140.01/8570.01** approved and listed in IAT Level III, IAM Level II, IAM Level III, IASAE I and IASAE II
- Other countries: **Australia –IRAP, Cyber Skills Framework; Japan –NICT; Singapore -NICF; Thailand -ETDA**

This Training Course is the **official training offered by (ISC)²**, with **standard content and duration** (40 hours) and conducted by experienced **authorised trainers of (ISC)²**. The well-designed contents distributed across 8 domains assist participants to gain the latest knowledge pertinent security challenges to make a well thought out decision in security strategy.

This course is subject to approval under the Reindustrialisation and Technology Training Programme (RTTP) with up to 2/3 course fee reimbursement upon successful applications. For details: <https://rttp.vtc.edu.hk>.

Course Content

This content of this course is based on the current CISSP exam outline. It has been refreshed to reflect the most pertinent issues such as supply chain attack happened in year 2021. It also covers best practices for emerging technologies (5G, IoT, cloud, container), threat intelligence and hunting.

The broad spectrum of topics included in the CISSP Common Body of Knowledge (CBK[®]) ensure its relevancy across all disciplines. Successful candidates are competent in the following eight domains.

Note: Effective May 1, 2021, the CISSP has a new exam outline. The domains and their weights are updated.

Date	Activities
Day 1 13 Jul 2021 (Tue)	<ul style="list-style-type: none">• Security and Risk Management• Asset Security
Day 2 14 Jul 2021 (Wed)	<ul style="list-style-type: none">• Asset Security• Security Architecture and Engineering
Day 3 15 Jul 2021 (Thu)	<ul style="list-style-type: none">• Security Architecture and Engineering• Communication and Network Security• Identity and Access Management (IAM)
Day 4 20 Jul 2021 (Tue)	<ul style="list-style-type: none">• Identity and Access Management (IAM)• Security Assessment and Testing• Security Operations
Day 5 21 Jul 2021 (Wed)	<ul style="list-style-type: none">• Security Operations• Software Development Security

Course Benefits

This course will help participants review and refresh their cloud security knowledge and identify areas they need to study for the CISSP exam and features:

- Official (ISC)² courseware
- Taught by an authorised (ISC)² instructor
- Student handbook
- Collaboration with classmates
- Real-world learning activities and scenarios
- A certificate of completion

Training Outline

Red text: Topics related to new cyber security trends

1. Security and Risk Management

1.1 Understand, adhere to, and promote professional ethics

- (ISC)² Code of Professional Ethics
- Organisational code of ethics

1.2 Understand and apply security concepts

1.3 Evaluate and apply security governance principles

- Alignment of security function to business strategy, goals, mission, and objectives
- Organisational processes (e.g., acquisitions, divestitures, governance committees)
- Organisational roles and responsibilities
- Security control frameworks
- Due care/due diligence

1.4 Determine compliance requirements

- Contractual, legal, industry standards, and regulatory requirements
- Privacy requirements

1.5 Understand legal and regulatory issues that pertain to information security in a holistic context

- **Cyber crimes and data breaches**
- Licensing and intellectual property requirements
- Import/export controls
- Trans-border data flow
- Privacy

1.6 Understand requirements for investigation types (i.e., administrative, criminal, civil, regulatory, industry standards)

1.7 Develop, document and implement security policy, standards, procedures, and guidelines

1.8 Identify, analyse, and prioritise Business Continuity (BC) requirements

- Business Impact Analysis (BIA)
- Develop and document scope and plan

1.9 Contribute to and enforce personnel security policies and procedures

- Candidate screening and hiring
- Employment agreements and policies
- Onboarding and termination processes
- Vendor, consultant, and contractor agreements and controls
- Compliance policy requirements
- Privacy policy requirements

1.10 Understand and apply risk management concepts

- **Identify threats and vulnerabilities**
- Risk assessment/analysis
- Risk response
- Countermeasure selection and implementation

Training Outline

Red text: Topics related to new cyber security trends

1. Security and Risk Management

- Applicable types of controls (e.g. preventive, detective, corrective)
- Control Assessment (security and privacy)
- Monitoring and measurement
- Reporting
- Continuous improvement
- Risk frameworks

1.11 Understand and apply threat modeling concepts and methodologies

- Threat modeling methodologies
- Threat modeling concepts

1.12 Apply Supply Chain Risk management (SCRM) concepts

- Risks associated with hardware, software, and services
- Third-party assessment and monitoring
- Minimum security requirements
- Service-level requirements

1.13 Establish and maintain a security awareness, education and training programme

- **Methods and techniques to present awareness and training (e.g. social engineering, phishing, security champions, gamification)**
- Periodic content reviews
- Program effectiveness evaluation

2. Asset Security

2.1 Identify and classify information and assets

- Data classification and Asset classification

2.2 Establish information and asset handling requirements

2.3 Provision resources securely

2.4 Manage data lifecycle

- Data roles (owners, controllers, custodians, processors, users/subjects) Data processors
- Data collection, data location, data maintenance, data retention, data remanence and data destruction

2.5 Ensure appropriate asset retention (e.g., End-of-Life (EOL), End-of-Support (EOS))

2.6 Determine data security controls

- Data states (in use, in transit, at rest)
- Scoping and tailoring
- Standards selection
- Data protection methods (e.g. Digit Rights Management (DRM), Data Loss Protection (DLP), **Cloud Access Security Brokers (CASB)**)

Training Outline

Red text: Topics related to new cyber security trends

3. Security Architecture and Engineering

- 3.1 Research, implement and manage engineering processes using secure design principles
 - Threat modeling
 - Least privilege
 - Defense in depth
 - Secure defaults
 - Fail securely
 - Separation of Duties (SoD)
 - Keep it simple
 - Zero Trust, Trust but verify
 - Privacy by design
 - Shared responsibility
- 3.2 Understand the fundamental concepts of security models
- 3.3 Select controls based upon systems security requirements
- 3.4 Understand security capabilities of information systems (e.g., memory protection, Trusted Platform Module (TPM), encryption/decryption)
- 3.5 Assess and mitigate the vulnerabilities of security architectures, designs, and solution elements
 - Client-based systems, Server-based systems, Database systems, Cryptographic systems
 - Industrial Control Systems (ICS)
 - Cloud-based systems (SaaS, IaaS, PaaS)
 - Distributed systems
 - Internet of Things (IoT)
 - **Microservices, Containerisation, Serverless, Embedded systems, High-Performance Computing Systems, Edge computing systems, Virtualised systems**
- 3.6 Select and determine cryptographic solution
 - Cryptographic life cycle (e.g., key management, algorithm selection)
 - Cryptographic methods (e.g., symmetric, asymmetric, elliptic curves)
 - Public Key Infrastructure (PKI)
 - Key management practices
 - Digital signatures and digital certificates
 - Non-repudiation
 - Integrity (e.g., hashing)
- 3.7 Understand methods of cryptanalytic attacks
 - Brute force, Ciphertext only, Known plaintext, Frequency analysis, Chosen ciphertext
 - Implementation attacks, Side-channel, Fault injection, Timing
 - Man-in-the-Middle (MITM)
 - Pass the hash, Kerberos exploitation
 - **Ransomware**
- 3.8 Apply security principles to site and facility design
- 3.9 Design site and facility security controls

Training Outline

Red text: Topics related to new cyber security trends

4. Communication and Network Security

4.1 Assess and implement secure design principles in network architectures

- Open System Interconnection (OSI) and TCP/IP models
- Internet Protocol (IP) networking
- Secure protocols
- Implications of multilayer protocols
- Converged protocols (FCoE, iSCSI, VoIP)
- Micro-segmentation (e.g. SDN, VXLAN, SD-WAN)
- Wireless networks (Li-Fi, Wi-Fi, ZigBee, satellite)
- Cellular networks (4G, 5G)
- Content Distribution Network (CDN)

4.2 Secure network components

- Operation of hardware
- Transmission media
- Network Access Control (NAC) devices
- Endpoint security

4.3 Implement secure communication channels according to design

- Voice
- Multimedia collaboration
- Remote access
- Data communications
- Virtualised networks
- Third-party connectivity

5. Identity and Access Management (IAM)

5.1 Control physical and logical access to assets

- Information, Systems, Devices, Facilities, Applications

5.2 Manage identification and authentication of people, devices, and services

- Identity management implementation
- Single/multi-factor authentication
- Accountability
- Session management
- Registration and proofing of identity
- Federated Identity Management (FIM)
- Credential management systems
- Single Sign On (SSO)
- Just-in-Time (JIT)

5.3 Integrate identity as a third-party service

- On-premise
- Cloud
- Hybrid

Training Outline

Red text: Topics related to new cyber security trends

5. Identity and Access Management (IAM)

5.4 Implement and manage authorisation mechanisms

- Role Based Access Control (RBAC)
- Rule-based access control
- Mandatory Access Control (MAC)
- Discretionary Access Control (DAC)
- Attribute Based Access Control (ABAC)
- Risk based Access Control

5.5 Manage the identity and access provisioning lifecycle

- Account access review
- Provisioning and deprovisioning (on/off boarding and transfers)
- Role definition
- Privilege escalation (managed service accounts, use of sudo, minimise its use)

5.6 Implement authentication systems

- OpenID Connect (OIDC) / Open Authorisation (Oauth)
- SAML, Kerberos, RADIUS / TACACS+

6. Security Assessment and Testing

6.1 Design and validate assessment, test, and audit strategies

- Internal; External; Third-party

6.2 Conduct security control testing

- Vulnerability assessment
- Penetration testing
- Log reviews
- Synthetic transactions
- Code review and testing
- Misuse case testing
- Test coverage analysis
- Interface testing
- Breach attack simulations
- Compliance checks

6.3 Collect security process data (e.g., technical and administrative)

- Account management
- Management review and approval
- Key performance and risk indicators
- Backup verification data
- Training and awareness
- Disaster Recovery (DR) and Business Continuity (BC)

6.4 Analyse test output and generate report

6.5 Conduct or facilitate security audits

- Internal; External; Third-party

Training Outline

Red text: Topics related to new cyber security trends

7. Security Operations

7.1 Understand and support investigations

- Evidence collection and handling
- Reporting and documentation
- Investigative techniques
- Digital forensics tools, tactics, and procedures
- Artifacts

7.2 Conduct logging and monitoring activities

- Intrusion detection and prevention
- Security Information and Event Management (SIEM)
- Continuous monitoring
- Egress monitoring
- Log management
- Threat intelligence
- User and Entity Behaviour Analysis (UEBA)

7.3 Perform Configuration Management (provisioning, baselining, automation)

7.4 Apply foundational security operations concepts

- Need-to-know/least privileges
- Separation of duties and responsibilities
- Privileged account management
- Job rotation
- Service Level Agreements (SLA)

7.5 Apply resource protection

- Media management
- Hardware and software asset management

7.6 Conduct incident management

- Detection
- Response
- Mitigation
- Reporting
- Recovery
- Remediation
- Lessons learned

7.7 Operate and maintain detective and preventative measures

- Firewalls
- Intrusion detection and prevention systems
- Whitelisting/blacklisting
- Third-party provided security services
- Sandboxing
- Honeypots / Honeynets
- Anti-malware
- Machine learning and Artificial Intelligence (AI) based tools

Training Outline

Red text: Topics related to new cyber security trends

7. Security Operations

- 7.8 **Implement and support patch and vulnerability management**
- 7.9 Understand and participate in change management processes
- 7.10 Implement recovery strategies
 - Backup storage strategies
 - Recovery site strategies
 - Multiple processing sites
 - System resilience, high availability, Quality of Service (QoS), and fault tolerance
- 7.11 Implement Disaster Recovery (DR) processes
 - Response
 - Personnel
 - Communications
 - Assessment
 - Restoration
 - Training and awareness
 - Lesson learnt
- 7.12 Test Disaster Recovery Plans (DRP)
 - Read-through/tabletop
 - Walkthrough
 - Simulation
 - Parallel
 - Full interruption
- 7.13 Participate in Business Continuity (BC) planning and exercises
- 7.14 Implement and manage physical security
 - Perimeter security controls
 - Internal security controls
- 7.15 Address personnel safety and security concerns
 - Travel
 - Security training and awareness
 - Emergency management
 - Duress

Training Outline

Red text: Topics related to new cyber security trends

8. Software Development Security

- 8.1 Understand and integrate security in the Software Development Life Cycle (SDLC)
 - Development methodologies
 - Maturity models
 - Operation and maintenance
 - Change management
 - Integrated product team
- 8.2 Identify and apply security controls in development environments
 - Programming languages, library, toolsets, IDE, runtime, Code repository
 - Continuous Integration and Continuous Delivery (CI/CD); Security Orchestration, Automation and Response (SOAR); SCM
 - Application security testing (SAST, DAST)
- 8.3 Assess the effectiveness of software security
 - Auditing and logging of changes
 - Risk analysis and mitigation
- 8.4 Assess security impact of acquired software
- 8.5 Define and apply secure coding guidelines and standards
 - Security weaknesses and vulnerabilities at the source-code level
 - Security of application programming interfaces
 - Secure coding practices
 - Software-defined security

Mode of Delivery

Webinar/Classroom-based Training

- The most thorough review of the CISSP CBK, industry concepts and best practices
- Five-day classes; eight hours per day
- Available at (ISC)² facilities and through (ISC)² Official Training Providers worldwide

Trainers

Mr Bernard KAN

Bernard KAN is an (ISC)² Authorised Instructor with over 20 years of information security experience as a security team leader in Banking, Telecommunication industry and CERT community.

Bernard has been delivering information security training to enterprises, talks to the public in security conference and sharing sessions to NGOs and he was a frequent speaker for security awareness training.

He was a part-time lecturer for City University of Hong Kong for a post-graduate Information Security certificate course for 6 years.

Bernard acquired several professional certifications including CISSP, GCIA, GCIH, CWSP, CCNP, MCSE and CEC. He also holds a Master of Science in E-Commerce.

Mr Peter CHEUNG

Peter CHEUNG is an (ISC)² Authorised Instructor with over 20 years of experience in IT industry. He is currently working in MNC as Regional Security Officer and Operational Security Readiness Manager, with experience in vulnerability management, incident management, risk management, security assessment and review. Before that, he worked in a global IT vendor as Network Security Specialist and Network Manager of a Datacentre.

Target Participant

This course is ideal for experienced security practitioners, managers, and executives interested in proving their knowledge across a wide array of security practices and principles.

Suitable for:

- Chief Information Security Officer
- Chief Information Officer
- Director of Security
- IT Director/Manager
- Security Systems Engineer
- Security Analyst
- Security Manager
- Security Auditor
- Security Architect
- Security Consultant
- Network Architect

Certificate Award

Participants who have attained at least 80% attendance of lecture will be awarded a certificate of completion issued by The International Information System Security Certification Consortium, Inc., (ISC)².

Prerequisites

To qualify for the cybersecurity certification, you must have:

- At least five years of cumulative, paid, full-time work experience;
- In two or more of the eight domains of the (ISC)² CISSP Common Body of Knowledge (CBK).
- Don't have enough work experience yet? There are two ways you can overcome this obstacle.

Satisfy one year of required experience with:

- A four-year college degree (or a regional equivalent). Or,
- An approved credential from the CISSP Prerequisite pathway. Take and pass the CISSP exam to earn an Associate of (ISC)² designation. Then, you'll have up to six years to earn your required work experience for the CISSP.

CISSP Examination Procedures

(ISC)² has introduced Computerised Adaptive Testing (CAT) for all English CISSP exams worldwide. You can visit the computer-based testing partner at www.pearsonvue.com/isc2 to set up your account, schedule your exam and settle payment directly. On your scheduled exam day, you'll have THREE hours to complete the 100 - 150 exam questions. You must pass the exam with a scaled score of 700 points or greater. For more details, please visit: <https://www.isc2.org/exams>.

Effective May 1, 2021, the CISSP exam will be based on a new exam outline. The domains and their weights have changed.

If you would like to understand more about the exam, kindly view the link: <https://www.isc2.org/Register-for-Exam> for your reference.

RTTP Training Grant Application

Companies should submit their RTTP training grant application for their employee(s) via <https://rttp.vtc.edu.hk/rttp/login> at least two weeks before course commencement. Alternatively, [application form](#) could be submitted by email to rttp@vtc.edu.hk along with supporting documents.

Enrolment method

1. Scan the QR code to complete the enrolment and payment online.
2. Mail the crossed cheque with payee name "Hong Kong Productivity Council" (in HK dollar) and the application form should be mailed to Hong Kong Productivity Council, 2/F, HKPC Building, 78 Tat Chee Avenue, Kowloon (attention to Ms Tracy CHOY). Please indicate the course name and course code on the envelope.

(Only receipt printed with receipt printers at HKPC is valid. Receipt of cheque payment is subject to bank clearance.)
