

# Cyber Security *FutureSkills* Series

*Become one of the most in-demand professionals!*

May 2023 Issue

CONNECTION TECHNOLOGY 裝備未來  
**FUTURESKILLS**

Official Training

Cyber security is critical in the digital era. Cyber security professionals have become enterprises' most sought after talents as they play an important role in protecting personal information and business data against cyber attacks.

Obtaining **internationally recognised qualifications** can help enhance your career prospects and build your professional image. HKPC Academy offers a wide range of professional cyber security programmes that can help you acquire dynamic and highly anticipated future skills!

## Ethical Hacker Series

### Certified Ethical Hacker (C|EH) & Practical

#### Programme Highlight

The Certified Ethical Hacker (C|EH) credential is the most trusted ethical hacking certification and accomplishment recommended by employers globally. It is the most desired information security certification and represents one of the fastest-growing cyber credentials required by critical infrastructure and essential service providers. C|EH is recognised as a standard within the information security community. C|EH v12 provides comprehensive training, hands on learning labs, practice cyber ranges for engagement, certification assessments, cyber competitions, and opportunities for continuous learning into one comprehensive program. The original core mission of C|EH remain valid and relevant today: "To beat a hacker, you need to think like a hacker."

**Date and time** 15-18 & 22 Aug 2023 (5 days)  
09:00 – 18:00

**Venue** HKPC Building

**Course fee** **Regular Course Fee :**  
HK\$21,600 per person for CEHv12 Elite Package to be CEHv12 and CEH Practical certified

## Cloud Series

### Building a Cyber Security, Cloud Protection and Privacy Framework

#### Programme Highlight

Cyber security is essential to any organisation, yet many are still struggling with establishing an effective cyber security protection model to protect their critical and sensitive assets. Migration to cloud and working from anywhere are adding more complexity and uncertainty.

Is there a standard cyber security model organisations can take reference to? How can the model be implemented in a pragmatic way to balance security protection versus business agility?

The answers are all in this workshop!
