PLAY 4 PERFORMANCE ROBOT WORKSHOP

Practical problems to train creativity and decision-making ability with calculated risks under time and resource constraints

What To Do?

The 3-hour training programme caters 30 employees to boost morale and build trust within the working team.

The programme includes 2 main parts: Road & Robot Building, and Bridge & Transport Building. In the program, participants need to build a structure to carry materials on robots and decide on the best transport route. They also required to build bridges by controlling robots with demands from customers.

What You Will Learn?

Participants will coach each other to achieve the same goals, give and receive feedback with empathy. They will also share skill sets during the activities. This programme focus on the importance of radical collaboration, experience sharing, and employee connection.
