Course Content

1. Essentials of Supply Chain Management

- Revisit basic supply chain principles, before expanding your perspective on the impact and influence of global supply chains.

2. Managing Supply Chains in a Changing World

- Uncover the challenges that a volatile, uncertain, complex and ambiguous (VUCA) world poses to supply chains, and the mitigating impact of a global perspective.

3. Practical Implications for Supply Chain Management

- Expand your conception of value and rethink dependencies with a global perspective on supply chains.

4. Designing Efficient, Resilient Supply Chains

- Discover how a life cycle approach and innovative business models can revitalise supply chain design.

5. Supply Chain Analytics

- Reflect on the importance of analytics and KPIs for optimising supply chain management.

6. Innovation and Supply Chain Technology

- Discover the role of technology in facilitating integrated supply chains, the new frontiers of digital supply chains and the opportunities for increased traceability.

7. Supply Chain Collaboration and Partnerships

- Consider the range of relationships that exist within contemporary supply chains, and how to extend and strengthen these relationships to optimise the design and impact of supply chains.

8. Rewiring your Supply Chain

- Recognise your ability to effect change, consolidate your support network and develop a strategy to realise your goals.

Target Participants

This course is designed for supply chain, logistics, finance, and business-related managers to develop practical supply chain knowledge and ready-in-mind skill sets, highlighting real case challenges and industry best practices in daily management.

Trainer's Profile

Dr Andy SUN
